

GB Industries Electrical Contractors Pty Ltd

Environmental Policy

It is GB Industries policy that the organisation undertakes all of its work with due consideration to environmental issues. To achieve this management is committed to making every reasonable effort in the areas of pollution prevention; protection and preservation of nature, bio-diversity and ecosystems; and mitigation of climate change.

Consistent with this approach, we will:

- Comply with all applicable environmental protection acts, regulations, standards such as ISO 14001 and codes of practice and apply standards which reflect GB Industries commitment to the Environment;
- Communicate this policy to employees and contractors and require them to comply with it and all relevant legislative and regulatory requirements;
- Implement a system which identifies, assesses, monitors and controls risk with the aim of eliminating pollution and ensuring the protection of nature, biodiversity and ecosystems in the areas that GB Industries work;
- Establish clear safety plans, measure performance, review progress against measurable objectives in monthly Office Meetings and quarterly Safety Committee Meetings and consistently strive for excellence;
- Provide ongoing training for all employees and contractors in regularly held Toolbox Meetings;
- Review this policy annually in consultation with GB Industries staff;

Signed:

Gavin Waring
Director
